

COLLABORATE

# ASSOCIATIONS AND FOUNDATIONS

We seek to link NGOs with other associations or foundations in order to increase the volume of resources, competencies and skills made available to the objectives and to achieve a more significant impact.

- Strategic alliances with the aim of increasing the key competencies of each entity, such as expertise in a specific sector or area, for the exchange of knowledge, skills or experiences, as strategic value for the achievement of common objectives
- Use our NGO as a platform to connect with your organisation, to design and implement your programmes in the KARIBIA area, as well as a way to achieve better financial sustainability and optimisation of resources
- Institutional integration as a joint service option and an alternative and innovative way to respond to the same mission in a changing and highly complex environment
- Linking or networking, formalised through networks themselves or other platforms as interrelationship channels
- KARIBIA may be the grantee (recipient or sub-recipient) of other organisations acting as the responsible manager and executor of the project allocated under the agreement

*We look for synergies together?*
